

BARE2D::XMLDataManager
::clearCache

BARE2D::ResourceManager
::clearCaches

BARE2D::Cache::clear

```
graph LR; A[BARE2D::XMLDataManager::clearCache] --> C[BARE2D::Cache::clear]; B[BARE2D::ResourceManager::clearCaches] --> C;
```

The diagram illustrates two separate calls to the `BARE2D::Cache::clear` method. On the left, two rectangular boxes represent the calling methods: `BARE2D::XMLDataManager::clearCache` (top) and `BARE2D::ResourceManager::clearCaches` (bottom). On the right, a shaded rectangular box represents the target method, `BARE2D::Cache::clear`. Two blue arrows point from the right side of each left box to the left side of the right box, indicating the direction of the calls.
